The idea behind the conference

The current situation caused by Covid-19 is a worldwide challenge for all events. The on-line international conference could facilitate the sharing of experiences (public sector, non-profit sector, academics, people involved in philanthropy...) in the field of social policies from different countries. They will present their own projects and related evaluations highlighting the reasons underneath the project or policy and the model adopted for the evaluation.

The conference includes:

- **9 key notes:** opening speeches that outline the theme of the day with reference to the evaluation of projects carried out by the presenting organisations
- **10 papers:** presentation of evaluation experiences carried out by promoters or other entities
- **1 round table**

Goals of the conference

- To share solutions and strategies with reference to the different contents of socially relevant projects.
- To know the development of solutions to assess the social impact in different social and cultural contexts.
- To give continuity to the comparison started in 2018 in Rome
- To disseminate the results of the comparison.

After the conference

After the conference, all presentations will be gathered in a special issue in Italian and English language. The special issue will include a summary of the results and recommendations, edited by the foundations promoting the conference.

Fondazione E. Zancan Onlus

The Fondazione «Emanuela Zancan» is a centre for research, study and experimentation that has been operating for more than 55 years in the field of social, health and education policies, welfare systems and human services. Its activities are conducted with the contribution of many researchers and experts from Italy and abroad. The Fondazione works in collaboration with public bodies, like regions, provinces, public health agencies, municipalities, universities, Italian and international study centers, and with private bodies in order to carry out studies, research and experimentation.

iaOBERfcs

iaOBERfcs (International Association for Outcome-Based Evaluation and Research on Family and Children's Services) is a small group of scholars in the area of outcome evaluation who came together to work collaboratively on descriptive and comparative evaluations and research on family and children's services. It was founded on June 25, 2003, by Fondazione Zancan and Boston College in partnership with 28 experts from around the world. Since then, an annual international seminar has been organized, where members can present their research.

ACRI

Established in 1912, Acri is the organisation representing Foundations of banking origin and Savings Banks. It is an apolitical, non-profit and voluntary organization. Acri represents 83 Foundations of banking origin and 13 Saving banks. From 2000 to 2019, Foundations associated to Acri have disbursed over 24 billion euros through more than 400 thousand initiatives and invested significant resources to pursue the mission objectives indicated by law: social utility and the promotion of economic development. Foundations of banking origin intervene in different fields from welfare to art and culture, from innovation to sustainability, from primary education to scientific research.
